## What is MSSQL LogManager

The MSSQL LogManager product family is a full-featured logging/auditing solution for Microsoft SQL Server 2000, 2005, MSDE 2 and SQLExpress 2005. MSSQL LogManager logs data changes in the database for different data manipulation operations (Delete/Insert/Update) on user-definable database objects (tables, columns). A point-and-click interface enables you to define easily, which database objects should be logged. If you are interested in logging a history of price changes in a table ARTICLE, just define it with one mouse-click and relax.

## Application Areas

- To answer questions like: "Who has when modified, deleted or inserted a certain record?"
- Change logs for statistical purposes (e.g. price fluctuations, ...)
- Tweak your client application regarding DML operations
- "Black Box Debugging" to see what DML operations are involved when you click a button in a foreign application

- Audit trails as a necessity to conform to different application domain quality standards (e.g. US Food & Drug Administration, ...)
- Data logs to recover a database to a specific point in time or to undo data changes or to keep several slave databases with one master database in-sync

## Features

- Supports Microsoft SQL Server 2000, 2005, MSDE 2, SQLEXPRESS 2005
- Supports table operation logging
- Supports table column logging
- Capable to capture multi-row DML operations
- Encryptable auditing triggers on demand
- Not for replication auditing triggers on demand
- Supported datatypes for column logging are all datatypes that are castable to the VARCHAR datatype
- Supports user-definable conditional logging
- Logging mechanism is integrated in the database. No extra coding in your client application necessary
- A powerful Prepare-Wizard supports you in creating all necessary logging metadata objects
- Load/Save logging metadata names within the Prepare-Wizard from/to a file
- Unprepare-Wizard cleans up your database from all logging data and logging metadata
- Supports a user-friendly way to define which database objects should be logged
- Definition of operation/column logging for a specific table or the complete database with one step
- Logging definition can be reused on similar databases by using the built-in logging definition Import/Export functionality
- Logging metadata of a prepared database can be exported and used on an unprepared database to prepare it without using the Prepare-Wizard
- Disable logging temporarily before doing a data import process without deleting all logging definitions
- Scripting engine to automate repetitive tasks in a script based way.
- Shows statistics how many operations and columns are registered for logging
- Supports browsing in logged data
- Load/Save browsing criterias from/to a file
- Logged data can be exported into one of the following formats (PDF, MS Excel, MS Word, RTF, HTML, Text, XML, CSV, DIFF, SYLK, LaTeX, SQL, Windows Clipboard)
- Logdata reporting ability. Coming soon!
- Online-Help
- A Read-Only version of MSSQL LogManager (MSSQLLMViewer), only for browsing, exporting and printing logged data is available as separate product.
- Registered users have unlimited E-Mail support and longlife product updates free of charge

## MSSQLLM Addon's

- **MSSQLLMViewer:** Same code base as MSSQL LogManager, but without the capability to change the logging schema.

## Prices

| <b>MSSQL LogManager</b>   | <b>Price/License</b> |
|---------------------------|----------------------|
| <b>1 User License</b>     |                      |
| 1-4 license(s)            | 99,00 EUR            |
| 5-9 licenses              | 80,00 EUR            |
| 10 and more               | 73,00 EUR            |
| Unlimited Bundle License* | 4990,00 EUR          |
| <b>Site License</b>       |                      |
| Site License              | 579,00 EUR           |
| <b>MSSQLLMViewer</b>      | <b>Price/License</b> |
| <b>1 User License</b>     |                      |
| 1-4 license(s)            | 39,00 EUR            |
| 5-9 licenses              | 32,00 EUR            |
| 10 and more               | 29,00 EUR            |
| Unlimited Bundle License* | 1990,00 EUR          |
| <b>Site License</b>       |                      |
| Site License              | 229,00 EUR           |
